

Rationale: There is a growing community of civil dissidents fighting back against state overreach and we should be encouraging all forms of ethical non-violence resistance.

Proposal: Add new plank “Agorism” at the end of “The Market” section of the Platform:

Agorism:

We affirm the right of individuals and businesses to subvert state regulation, taxation, and restrictions enacted by executive order, through black and grey market activity, so long as such activity does not violate the individual rights and liberties of customers or community members through theft, fraud, or violence.

MOTION: *Move to add the following to the end of “The Market” section of the Platform:*

Agorism:

We affirm the right of individuals and businesses to subvert state regulation, taxation, and restrictions enacted by executive order, through black and grey market activity, so long as such activity does not violate the individual rights and liberties of customers or community members through theft, fraud, or violence.
