

## Are There Any Easy Solutions to increasing Housing Supply?

# T LIBERTARIAN Party of Washington

---

**To decrease the cost of housing, we must build enough supply to satisfy the demand.**

**Housing costs are based simply on supply and demand.**

---

**We need to remove any zoning law regarding where, what kind, and how high housing can be built.**

**This will increase supply without the city having to do a thing, and would cost the taxpayer ZERO.**

---

**Waive building fees, drop the cost of permitting fees to only cover the cost of service, and eliminate any rule determining what style of housing can be built.**

**We let the market decide what kind of housing people want!**

---

**Builders and developers WANT TO BUILD. It is the city, county and state holding them back. While government champions themselves as the only solution to the housing crisis, the reality is that the **government is the cause of the problem** in the first place!**
