

**Do we need a Pay  
Per Mile Tax?**

# T LIBERTARIAN

Party of Washington

---

Washington drivers currently pay the **2<sup>nd</sup> HIGHEST** gas tax, and enjoy the **7<sup>th</sup> WORST** road quality.

The money we pay is not being used wisely!

---

Zoning, property taxes, and other artificial limits on housing are forcing low income families out of the city, further from their workplace.

**This program will make the poor struggle even more.**

---

The current per gallon system has a less than 1% overhead, the pay per mile system is projected to be from 2-12% overhead!  
**Increased overhead means increasing waste on bureaucracy!**

---

**Massive privacy issues** come with having to place a tracking device in your car. Not using the device, will force you to pay for miles driven on private roads AND out of state.

---

It is sold as a replacement of the gas tax. **Washington taxes never get repealed**, they only get repurposed. Be prepared to pay tolls, vehicle excise tax, per-mile tax, gas tax, license fees, property tax, and everything else to drive on our roads.
