The Libertarian Party of New York was founded in 1973 as a political organization which has as its primary objective the extension of individual freedom to its furthest limits. In recognition of the fact that the initiation of force by government has been the chief instrument for the expropriation of individual rights and freedom, the Libertarian Party of New York enters the political arena for the avowed purpose of eliminating the intervention of government in moral, social and economic affairs by functioning as a libertarian political entity separate and distinct from all other political parties or movements and moving public policy in a libertarian direction by building a political party that elects Libertarians to public office.
