Please give a brief (a few sentences) summary of your understanding of Libertarian philosophy?	The philosophy is rooted in the non-aggression principle whereby initiating force against peaceful people is not justified. State actions should be judged by the same standards which we hold average people to. It is the philosophy of civilized peace and cooperation derived from a clear understanding of the human condition.	The Libertarian philosophy boils down to the state of freedom. Which means, you as a independent human being own yourself and the product of your labor and that it's counterproductive and unethical to use force and coercion against another human being. Government being a territorial monopoly on force and coercion is counterproductive and violation of freedom.	Essentially individual liberty is paramount; my rights end where your nose begins and your rights end where my nose begins.

Please give a brief (a few sentences) summary of your understanding of Libertarian philosophy?	Am I allowed to cop-out to the classic "Don't hurt people and don't take their stuff." Although I like a slightly more complex concept of accepting property rights as an axiom, and that philosophically one certainly owns their self, and any emanations of self (e.g., performing work to transmute an input product) as described by Murray Rothbard in For A New Liberty.	You can only have freedom if you are willing to give others freedom. The only thing the state can do is interfere with freedom. If one assumes there is a legitimate role for a state at all, that state must be strictly limited to protecting individual rights.	The only legitimate use of force is defensive force and that all human interactions should be voluntary.

Moving to bylaws meetings every two years should calm some of the natural tendency to keep tweaking.
Please give a brief (a few sentences) summary of your understanding of Libertarian philosophy?	Individual rights and responsibilities are of the highest priority. National government's purpose is to protect the life, liberty, and property of citizens and to provide national defense. Free voluntary exchange, not artificially manipulated markets.	Every individual has an inalienable right to self ownership and by extension a right to their property. The initiation of violence or the threat thereof against any individual or their property by any other individual, group, or organization is a violation of these rights. A libertarian opposes this violation of individual rights makes no exceptions for government or anyone else.	Don't tread on the rights of others and don't use government to force others into your idea of how they should live.
